

## Kingsway Archery Triad Double Pin Sight

**Weight:** 8.37 oz (mounting bracket not included)

**Inside Diameter of Aperture:** 1.955"

**MSRP:** \$109.95 (manufacturer)

**Warranty:** The product is warranted against defects in materials and workmanship under a Limited Lifetime Warranty from the original date of purchase. This warranty does not apply to items subjected to misuse or accidental damage, which will be determined by the manufacturer

### Introduction and General Comments:

The Kingsway Archery Triad Double Pin Sight comes fully assembled. The sight comes with alternative distance labels. Additional clips are provided which holds the position of the fiber to the mounting bracket. The aperture is made from a composite material.

### Adjustability: Scored 9.84 points

The typical ranges experienced per this evaluation were:

Maximum: 17.00 points

Minimum: 3.00 points

### Craftsmanship/Workmanship:

This section was unable to be evaluated due to sights design and concept. The sight invokes a concept that has a relationship similar to a typical partridge gun sight. The pins configuration, with a front and rear aperture, helps the archer to focus in on the rotational movements that would be noticed in your bubble vial. The need for a bubble vial in this particular sight seems to be unnecessary. The concept used has been proven for centuries; use in today's archery products has been widely accepted.

**Fiber Durability:** This section was unable to be evaluated due to lack of adequate fiber thread sample.

Note: Fiber depth within aperture measured from the rear of the sight 0.00", the aperture has no cutouts.

### Fiber Illumination:

### Vibration Analysis:

This analysis revealed no movement in windage front or rear. Movement was experienced with elevation cantilever arm. The arm does have a nylock screw that can be tightened to a desired tension, which allows for the user to control the amount of force required to reposition the arm. No physical damage occurred.
